

USE INSTRUCTIONS

STITCH OPTION: Combine multiple images to produce a panoramic image or a high-resolution image. Choose your folder containing the single images to stitch. The composed image will appear in the same folder at the end of the process as **folder_name_stitched.tif**.

RESIZE OPTION: Change the size of your images choosing a suitable scaling factor. Choose your folder containing the images you want to resize and choose a scaling factor for width and height between 0-1. A scaling factor for width of 0.2 is equal to scaling the image to 20% width. The resized images will appear in the same folder at the end of the process as **name_resized{extension}**.

REMOVE BACKGROUND OPTION: Remove the background of your image. The image without the background will appear in the same folder at the end of the process as **name_no_background.tif**.

SHARP OPTION: Sharpen the details of your image. The sharpened image will appear in the same folder at the end of the process as **name_sharpened.tif**.

The current process will be displayed in the Console window.

If the program does not respond, please wait, **it is still running**.
